

Xtivia's Portal Assessment solution is designed to ensure that your Employee, Customer, and/or Partner Portal Initiative is successful in the long run. It involves all key stakeholders and project sponsors from both the business and technology sides of your organization to ensure that a common vision is established at the outset. In working towards this common vision, Xtivia's Portal Specialists will conduct interviews and requirements-gathering sessions with your team to capture both short-term and long-term objectives and desired functionality. Our Portal Experts will work with your technology team to assist with Portal Technology selection. They will conduct a workshop where the requirements and technology selection will be reviewed with relevant stakeholders to ensure a common understanding. We will wrap up the assessment with a "Portal Implementation Roadmap" that enables you to implement your Portal Vision in a phased manner.

About Xtivia

Xtivia is a global business and technology consulting firm that provides enterprise eBusiness solutions to leading corporations. Xtivia enables clients to utilize and leverage the most appropriate web-based technologies quickly and cost-effectively by utilizing Xtivia's experience, talent, and proven methodologies.

Since 1992, Xtivia has established a proven, global reputation as a company that delivers leading edge professional solutions to our clients' specific requirements regardless of the complexity of the projects. Xtivia's success has stemmed from a proven ability to deliver quality professional services, allowing the client to leverage the Web successfully, competitively, and profitably.

Xtivia works with many U.S. blue-chip companies, international organizations and medium-sized growth-oriented companies. We have delivered numerous solutions for some of the most respected and admired corporations and organizations throughout the world.

Benefits

The Portal Assessment solution is a vital element for the success of your Portal Initiative and brings several benefits including:

- Buy-in for the Initiative from the business and technology teams that will assist in Portal adoption
- Development of an appropriate phased approach that takes feature prioritization into account and delivers a functional portal sooner
- Potential to realize ROI more quickly
- Risk identification and mitigation
- Skills transfer

Offering Details

Xtivia's Portal Assessment includes:

- **Portal Requirements.** In our experience, Portal Requirements are best modeled in terms of functional requirements, non-functional requirements, and content requirements viewed in context of user communities. As part of this assessment, we will conduct the following activities towards defining the requirements model:
 - User Community Definition
 - Content Inventory
 - Application Inventory
 - Determine Portal Navigation
 - Build Page and Portlet Matrix
 - Capture Non-functional Requirements
 - Determine Content Taxonomy
- **Portal Technology Selection.** If you have not chosen your Portal Technology, we will work with your technology team to perform an analysis of various Portal products (including various offerings from IBM, Microsoft, Open Source, and others) and assist in selecting the product that best fits your needs and vendor relationships.
- **Portal Architectural Needs.** We will review various Portal development and deployment needs with your IT team to ensure that they are adequately addressed.

- **Portal Approach Review Workshop.** We will conduct a Portal Workshop with key Line of Business and Technology team stakeholders to review, refine and prioritize requirements, review portal technology analysis results and technology selection, discuss how the portal product's features map to the requirements, and establish a common vision between the IT and business teams for the Portal.
- **Portal Assessment Document.** We will deliver a document capturing the Requirements Model, Portal Technology Selection, Architectural Specifications, and a Portal Roadmap.
- **Portal Implementation Phase I Work Plan.** Based on your need for Portal Implementation help, we will deliver a work plan to implement an initial version of a functional Portal. This can range from Portal Mentoring during architecture definition to a completely fixed-price turnkey statement of work.

During the course of our assessment, we will highlight potential issues, make recommendations, identify areas that should be further investigated, and offer general mentoring and expert knowledge transfer.

This highly interactive project involves significant client participation. To ensure resounding success, we ask that you make key staff members available as needed.

Pricing

The Portal Assessment solution is a fixed-price and fixed-time engagement that is priced based on the scope which is established prior to kick-off. This solution typically runs for 3 to 5 calendar weeks and is priced starting at \$12,000 for a three week assessment.
