We help you answer the following questions:

- Can it be done?
- How long will it take?
- How can it be done?
- What are the risks?
- What will it cost?

At Xtivia, we pride ourselves in providing quality database migration services at the right price. When you work with Xtivia, you receive:

- Accurate costing and sizing of the migration
- The expertise necessary to help control the risk associated with database and related application migration
- Cost effective database migrations
- Significant knowledge and experience in moving applications and associated database from one OS platform to another

Successful Database Migrations

Xtivia's database migration services can help you move forward with an efficient and effective database migration when:

- Current platforms have limited or discontinued support and you want to leverage more powerful and supported technologies.
- You want to retain time, resources, and money invested in an existing application.
- Dependencies on fewer resources with legacy skill sets make it difficult to support existing applications/database.
- You want to reduce cost of ownership by moving to a more adapted platform in terms of resource availability, server and data consolidation.

Analysis of each of the above areas is critical to a successful database and application migration.

What We Do

Help you with the migration of your database, from one database vendor to another, from one operating system to another, or an upgrade from your current database version to a newer version

What You Get

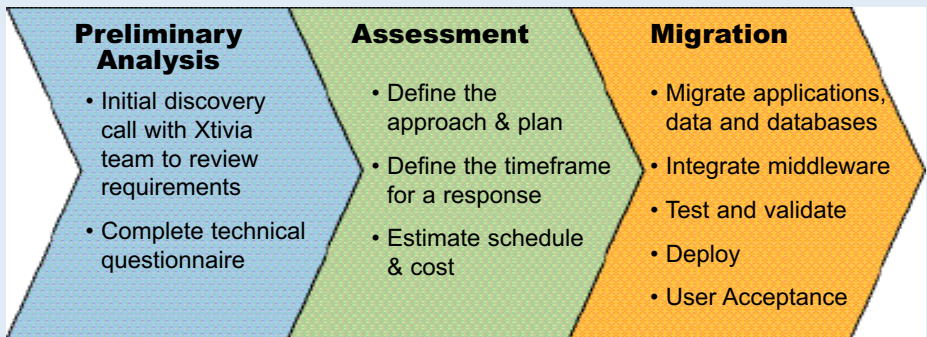

A complete turnkey solution to meet your database migration needs including risk analysis, approach and planning, estimation and costing, actual migration and standard warranty support

What You Achieve

Lesser risks, maximized ROI, boosted productivity, and peace of mind

Approach and Benefits

Xtivia uses the following approach for migrating databases:

Xtivia supports the following migration platforms:

Source \ Destination	Oracle	SQL Server	Informix	DB2 UDB
Oracle	*	✓	✓	✓
SQL Server	✓	*	✓	✓
Informix	✓	✓	*	✓
DB2 UDB	✓	✓	✓	*

* These will be database version upgrades or migrations of the same database product to a different operating system.

Xtivia's team of database migration specialists have helped clients of all sizes that were faced with finding qualified resources in the database migration area. Xtivia, an industry leader, has been successfully providing database migration consulting services to clients of all sizes for several years, both domestically and abroad.
