SUMMARY

LIFERAY DEVOPS STRATEGY FOR A U.S. INDUSTRIAL EQUIPMENT CORPORATION

As part of this engagement, we helped a major US industrial equipment manufacturer with strategy and a proof-of-concept implementation around their Liferay DevOps methodology. The strategy spanned a broad gamut of topics including source code management, versioning strategy, automated builds, repository management, continuous integration, automated deployments, automated functional testing, load testing, Liferay environments, Liferay high availability, Liferay patching, systems monitoring, APM, and more. Our proof-of-concept involved stitching together myriad technologies including Git, Nexus, Maven, JIRA, Bamboo, Stash, JMeter, Selenium, JUnit, and more.
